

CYBERCLOUD PRODUCTS & SERVICES
LIVE AT RACK CENTRE

CYBERCLOUD PRODUCTS – PLATFORM-AS-A-SERVICE

PLATFORM-AS-A-SERVICE (PaaS)

- CyberCloud's Platform as a Service provides a wide variety of stable platforms as may be needed by different types of software verticals and in different applications.
- The service gives our customer's the freehand to select from a large bouquet, the platform that suites the workload they intend to run and the use case they want to see.
- With this single selection, the customer does not need further border about the underlying services

CYBERCLOUD PRODUCTS – SOFTWARE-AS-A-SERVICE

SOFTWARE-AS-A-SERVICE (SaaS)

- This service provides a wide range of subscription-based software licenses that may be used within the customer's Cybercloud deployments.
- This includes operating systems licenses, application licenses, security suite licenses and more.
- This SaaS layer on the Cybercloud's IaaS completes the CyberCloud's subscription-based cloud vision by ensuring the customer does not have to make any CapEx based investment to run-off our cloud platform.
- Customers therefore pay for these licenses from inception till the day the service or machine is turned-down.

CYBERCLOUD PRODUCTS – CLOUD IVS

CLOUD IVS

- Cybercloud's Cloud Intelligent Video Surveillance (Cloud IVS) solution, provisions two critical surveillance requirements for our customers; Intelligence and Storage space for camera feeds
- The solution allows for the safe offloading of camera video feeds from on-premise to Cybercloud using powerful bandwidth optimization and data compression techniques, while retaining the imbedded signatures within the video stream
- Once within the Cybercloud's Cloud IVS platform, a layer of intelligence and analytics is then applied, making it possible for value-adds to be derivable from these feeds.

CYBERCLOUD PRODUCTS – BACKUP-AS-A-SERVICE

BACKUP-AS-A-SERVICE (BaaS)

- CyberCloud's backup-as-a-Service offers a reliable and cost-effective way to protect your files, workloads and machines. The content that is backed-up could span from just data on a disk to a virtual machine or an entire data centre.
- CyberCloud's BaaS also provides immutability protection, that adds a layer of security to the backed-up files/images and ensure that on-premise infections by ransomware cannot be passed unto the backup image side.
- The 360 degrees protection offered by CyberCloud's BaaS gives provides rest for our customers against to disasters and in meeting regulatory requirements.
- Choose CyberCloud's Backup-as-a-Service today and protect your business

CYBERCLOUD PRODUCTS – DR-AS-A-SERVICE

DISASTER RECOVERY-AS-A-SERVICE (DRaaS)

- Recover or Fail-over to your CyberCloud environment in the event of a failure on your primary service or data center.
- This offering from CyberCloud provides both service availability and business continuity to our customers and ensures that their own line of business applications do not suffer prolonged disruptions.
- This service may be partly activated on a set of backed-up VMs or on the entire data center.
- CyberCloud allow you to set the granular business continuity parameters like recovery time and recovery point objectives

CYBERCLOUD PRODUCTS – DESKTOP-AS-A-SERVICE

DESKTOP-AS-A-SERVICE (DaaS)

- Are you considering protecting your Intellectual Property along its entire life-cycle, then the CyberCloud Desktop-as-a-Service is the platform of choice.
- This service is suited for organizations that deal with intellectual property and run a high risk of it being copied/ transmitted to third parties or falling into the wrong hands where a user's laptop/device gets missing or stolen.
- As the first layer of protection against loss, this service ensures that no valued information resides on the physical or on-premises devices of the users. It also ensures that strict security hardening may be applied to the virtual desktop version protecting the valued information even on the cloud side.

CYBERCLOUD PRODUCTS – VMWARE SD-WAN

VMWARE SD-WAN

- Our VMware Software-Defined Wide Area Network (SD-WAN) enables our customers can combine the different flavours on network services (LTE, MPLS, Wireless, Broadband) to achieve their corporate objectives.
- More than just data, our customers may move their infrastructure across their location to meet business requirements and simplify operational complexities.
- Request for a demo today.

CYBERCLOUD PRODUCTS – VMWARE HCS

VMWARE HYPERCONVERGED SOFTWARE

- With this package, customers can converge an entire datacenter stack, including compute, storage, storage networking, and virtualization; replacing complex and expensive legacy infrastructure by a platform, enabling enterprises to start small and scale one node at a time
- CyberCloud offers this as a metered service, where the enterprise pays from only the part of the virtualized infrastructure that is in use as a license subscription with all the support included

CYBERCLOUD PRODUCTS – CONTAINER SERVICES

CONTAINERS

- CyberCloud's Container solution empowers a clean separation of concerns, making developers focus on their application logic and dependencies, while IT operations handle deployment and management without bothering with application specific details of the app.
- Signup to CyberCloud's container service today and have your application developers push code into a code created infrastructure/platform with capabilities like auto-scaling enabled.

CYBERCLOUD PRODUCTS – PROFESSIONAL SERVICES

PROFESSIONAL SERVICES

- Cybercloud offers **Network and Server Virtualization** of on-premise environment to enable Hybrid-Cloud scenarios, Management Automations, Operations, Mobility
- Also, we offer **Infrastructure Management** and administration of virtualized environments.
- We are skilled at this, so let us help you start your digitalization journey the right way.
